Life as an Entrepreneur

The Trigger: Why did you become an entrepreneur? What prompted you to take that first step? How did you develop the concept for your business?

I became an entrepreneur because I find pleasure in contributing to the wellbeing of society. Being an entrepreneur is a valuable role as it provides something meaningful to humanity through the sacrifice of my commitment as an entrepreneur.

Access to knowledge and information from my university (UPEI) as well as support from family and professors promoted me to take the first step to becoming an entrepreneur.

The concept of my business was developed out of the idea that climate change is an ongoing and a global threat. When I started reading and understanding more about the impact of climate change on the (MENA) region from which I originate, I discovered untapped opportunities that arise along with climate change.

My business will apply the concept of globalization by assisting communities in need.

Describe your greatest accomplishment/most rewarding moment of your career as an entrepreneur?

To me, seeing constant progress in my own creation is the accomplishment of my career as an entrepreneur.

Please describe your next challenge or plans for your business or for yourself as an entrepreneur:

My plans for the business and myself always intersect as I view us as intermingled. The main plan is to be able to establish global supply and communication channels between Canada

and other areas of the world. In addition to that, I plan to illuminate Canada, especially PEI as a brand to help drive more tourists to the province and contribute in the refreshing of its economy.
